fossLED | The Linear Edition

The fossLED Linear Edition features our specially manufactured LED Strip, Linear LED Flex, Rigid boards and associated products as well as our UK assembled custom Linear luminaires.

We pride ourselves in offering one of the most specialist and comprehensive ranges in this domain and strive in delivering quality at a value proposition.

Our aim is to transform your ideas and designs into a reality; our dedicated technical sales, lighting design and after sales teams are always on hand to consult you no matter the project size.

We strive for simplicity; our in-house workshop offers a fast bespoke service on almost all product ranges to aid your design needs and make installations quick and easy.

LED STRIP & RIGID BOARDS

INFINITY WALL - Internal Driver.....165-168

CUSTOM LINEAR SYSTEM

Modular LINEAR Lighting System..... 169-170

LED STRIP & BOARD | SERIES

At fossLED we offer an extensive range of LED strip and rigid board products to suit a host of different applications. From standard strips to speciality Ultra Run models allowing for up to 25 metre continuous runs and Nano strips with a width of only 4mm for use in joinery, to high power strips and rigid boards offering up to 4180 lm per metre in high colour rendering.

All products are made from premium components to ensure only the highest quality finish; our LED strip units feature a minimum of CRI92+ to CRI97+, ensuring an extra clean light output and colour temperature. LED chips are then mounted onto a minimum 2 ounce to 5 ounce PCB backing providing durability and superior heat dissipation, ensuring all our products last longer; this is then backed up by our 5 year extended manufacturer's warranty.

LED STRIP | RIGID BOARDS | LINEAR LED FLEX | SPECIFICATIONS & THE LINEAR EFFECT

At fossLED we offer a comprehensive range of LED Strip, Rigid boards and LINEAR LED Flex products to suit almost any Linear lighting installation. The below table is to help guide users towards the best suited products for their application.

For a LINEAR no dotted effect where required, please note our "Linear in Extrusion depth of" column. Here we list the minimum Aluminium Extrusion depth required in order to achieve a Linear effect when used in conjunction with the applicable product. Please note that where listed as LINEAR; this product can achieve a LINEAR effect in any fossLED Aluminium Extrusion combination.

LED DRIVER CHART | NON DIMMABLE (W) / **MAINS DIMMABLE (W)**

At fossLED we offer a comprehensive range of LED Drivers to suit a variety of installation requirements. The below LED Driver chart is to help guide you to find the correct driver based on your choice of LED product and the length in metres you wish to run. Please note this table illustrates options on our standard and Mains dimmable driver ranges only, please contact us if you require assistance with DALI & LINEAR driver ranges.

The max strip run column dictates the maximum length we recommend you run each specific model before being affected by voltage drop and light loss. All columns summarise metre lengths and the corresponding driver wattages from the fossLED Drivers range we recommend in Non dimmable I **Mains Dimmable** in bold.

MINI Connectors | **Fit In All fossLED Extrusions**

Our MINI Connectors are designed to make installations quick and easy, replacing the need for conventional soldering. fossLED connectors pierce wire and PCB components for a fully secure and reliable connection.

Strip to Wire Connectors - Cut LED Strip to your desired length and simply clip on, choose from our pre-flexed units or custom lead models.
Strip to Strip Connectors - Connect two peices of LED Strip together too increase your run length.
Corner Connectors - Connect two LED Strip runs together for use in corners.

LINEAR LED FLEX | SERIES

At fossLED we offer an extensive range of LINEAR LED FLEX products to suit a variety of different applications. This new specialist range is available in a Top view, Side bend, and Ultra Run series allowing you to create vertical and horizontal lighting effects and cater for extra long runs.

fossLED LINEAR LED FLEX products are unique in the way they can be set and manipulated and feature anti corrosive, UV and salt water resistant properties making them the perfect solution for outdoor facade, marine, feature, and signage lighting. We offer this range in a multitude of different wattages, sizes, colours and reel lengths to cater for almost any project and design demands, please also view our accessories and customisation sections for further helpful related installation products and services.

10W | LINEAR Top View

Our LINEAR LED FLEX Top View 10w per metre features high efficiency 2835 LEDs on a 2oz PCB board. Housed in a solvent, salt water and UV resistant extruded silicone tube, this product does not require mounting onto a heat sink and offers a LINEAR output in all applications.
Top View Flex units can be manipulated vertically up to a 200mm radius with the light source encapsulated along the bottom / top of each run.

ALUMINIUM EXTRUSION | SERIES

Aluminium Extrusions are a vital element to any LED Strip installation, offering aesthetical benefits with an improved diffusion of light, and most vitally acting as a heat sink backing to your LED light source, thus ensuring a pro-longed component and product life.

At foss LED we offer a wide selection of extrusions for a host of different applications. All models are made from premium 6063 grade aluminium; designed to an optimum thickness and heat tested to ensure they offer the best performance when paired with foss LED strip.

We also offer a number of our extrusions in White and Black finishes as well as lengths of up to 2.5 metres, and our new unique black diffusers. We strive to offer a comprehensive range in this series and are continually launching new models. Please feel free to enquire with us for any special requests.

LED DRIVER | SERIES

At fossLED we offer a vast number of different driver options and protocols to suit a host of different application types.

Our standard non dimmable drivers range from 10 - 600w offering users extra choice in finding the right driver to suit installation parameters; facilitating cost savings and high power capabilities.

Choose from a series of different integrated dimming protocols such as Mains/Triac and DALI dim, as well as housing types including our new special integrated LINEAR drivers for use with drop down gear tray aluminium housings.

CONTROL GEAR | SERIES

At fossLED we offer a comprehensive range of dimmers, controllers and decoders to help integrate lighting into your chosen environment. Our controller units are available in Single colour dimming, Tuneable White, RGB, RGBW & RGB + CCT Series, which are then offered in hand held remote and Wall mounted editions.

All fossLED controllers and receivers are compatible with one another, integrate any number of controllers to existing fossLED receivers, for IOS & Android integration simply just add our Wifi hub to your existing set up.

For lighting system integration we offer decoders in 0-10v, DALI, DMX and our new TRIAC decoders for mains dimming systems. For further technical information on this range please view our data sheets online or consult a member of our team.
